Hiring Manager

Re: Application for [Software Developer](#)

Dear Hiring Manager,

I am writing to express my strong interest in the [Position Title] role at [Company Name]. With over three years of hands-on experience building and shipping production-grade software specializing in Flutter and Java Spring Boot, I am confident in my ability to deliver meaningful, high-quality contributions to your team from day one.

In my most recent role as a Software Tester and, prior to that, as a Software Developer at AnnexTech Software, I architected and maintained full-stack mobile and backend solutions that consistently achieved 99.9% uptime. I built multi-layer test automation suites using Appium, flutter_test, RestAssured, and JUnit that raised code coverage by 40% and reduced production defect leakage by 65%. I also validated 70+ RESTful endpoints against OpenAPI 3.0 specifications with automated JWT rotation, achieving a 98% first-pass deployment success rate. On the development side, I applied Clean Architecture principles with flutter_bloc and dependency injection to deliver scalable, maintainable features across multiple RBAC modules.

I have a strong track record of improving delivery pipelines: by combining 80%+ test coverage with parallel GitHub Actions workflows, I shortened deployment time by 40%. I also have practical experience with Docker, Kubernetes, Firebase, and cloud platforms (Google Cloud), and I hold a Google Professional DevOps Engineer certification. Whether the role involves building new features, improving test quality, or enhancing CI/CD reliability, I am well-equipped to add measurable value.

Beyond technical skills, I bring a results-oriented mindset, clear communication across cross-functional teams, and the adaptability to thrive in fast-paced environments. I am fluent in English (C1), conversational in German (B1), and available to start immediately. I am genuinely excited about the opportunity to contribute to the company's goals and to continue growing as an engineer within a collaborative team.

I would welcome the chance to discuss how my experience and enthusiasm align with your team's needs. Please find my resume attached, and feel free to reach out at **vatsalde0311@gmail.com** or **+49 162 163 0552** at your convenience. Thank you very much for your time and consideration.

Yours sincerely,

Vatsal K. Maisuria
