📄 SUMMARY

Full-stack developer specialised in Flutter and Java Spring Boot with 3+ years delivering production-grade applications at 99.9% uptime. Cut production defects by 65% and deployment time by 40% through test automation and CI/CD optimisation. Currently, seeking a Software Developer or QA/SDET role in Europe, available immediately.

📁 PROFESSIONAL EXPERIENCE

- 11/2024 – 05/2025
Gujarat, India
- Software Tester, [AnnexTech Software](#)**
- Built a multi-layer test automation suite (Appium/flutter_test, RestAssured, JUnit) across Flutter and Spring Boot microservices, raised code coverage by 40% and cut production defect leakage by 65%.
 - Validated 70+ RESTful endpoints against OpenAPI 3.0 specs with automated JWT rotation and schema checks; achieved 98% first-pass deployment success and 99.9% uptime SLA.
 - Led defect triage sprints with Jira, Firebase Crashlytics, and Spring Boot Actuator to isolate race conditions and N+1 bottlenecks, trimming MTTR by 45%.
- 07/2022 – 10/2024
Gujarat, India
- Software Developer, [AnnexTech Software](#)**
- Architected feature-first Clean Architecture for the E-Society Flutter app using flutter_bloc, get_it DI, and null-safety; standardised JSON contracts across 5 RBAC modules with freezed + json_serializable.
 - Achieved 80%+ test coverage (flutter_test, bloc_test, mockito), catching 60% of regressions pre-staging and enabling parallel GitHub Actions runs that shortened deployment time by 40%.
 - Optimised high-frequency ledger rendering with const widget trees and ListView.builder, lowered heap churn by 40% and sustained 60 FPS under real-time sync load.

🎓 EDUCATION AND CERTIFICATES

- 07/2019 – 06/2023
Gujarat, India
- Bachelor of Engineering, [Gujarat Technological University](#)**
Computer Science and Engineering | Final CGPA: 8.32
- Google Professional DevOps Engineer (2023)**
Google Cloud Big Data & Machine Learning (2025)

📁 KEY PROJECTS

- 02/2022 – 01/2023
- [Image Segmentation & Object Detection](#)**, Python, OpenCV, TensorFlow, Dart
- Trained and benchmarked segmentation models (YOLO + custom CNN) on custom datasets; integrated into a Flutter preview UI.
- 02/2025 – 04/2025
- [Voice Recognition Agent](#)**, Python, spaCy, NLTK, FastAPI
- A FastAPI-based voice agent featuring NLU-driven intent classification and entity extraction for seamless mobile integration
- 10/2025 – 12/2025
- [AI Team-Meetup](#)**, JavaScript, HTML, CSS, PowerShell
- Real-time multilingual video chat application supporting simultaneous cross-language conversations with zero-latency translation.

🧠 SKILLS

Programming Languages: Java, Dart, Python, C++, SQL, JSON, XML, Bash, Shell, **Backend & APIs:** Spring Boot, Spring Security (JWT/OAuth2), Spring Data JPA, RESTful Microservices, OpenAPI 3.0, dio, retrofit, freezed, json_serializable, **Database & Storage:** MySQL, PostgreSQL, Redis, Firebase Firestore, Hive, Drift, Offline-first Caching, **Cloud & DevOps:** Docker, Kubernetes, GitHub Actions, Fastlane, JFrog Artifactory, Firebase (Auth, Crashlytics, Remote Config, App Distribution), **AI/ML:** TensorFlow, PyTorch, LangChain (Dart), NLP (spaCy, NLTK), OpenCV, Computer Vision, FastAPI Bridge, **Soft Skills:** Project Management, Project Leadership, Problem Solving, Decision Making, Results-Oriented Approach, Strategic Planning, Cooperative.

🌐 LANGUAGES

English: Professional (C1), **German:** Advanced (B1), **Hindi:** Native (C2), **Gujarati:** Native (C2)
