Full-Stack Developer with 3+ years of experience engineering production-grade applications and maintaining 99.9% uptime. Expert in Flutter and Java Spring Boot, with a proven track record of optimizing software delivery lifecycles. Accelerated production rates by 65% and slashed deployment timelines by 40% through advanced test automation and CI/CD pipeline optimization. Demonstrated leader and technical mentor to 3+ developers, driving code quality, engineering best practices, and team autonomy.

🏆 KEY ACHIEVEMENTS

- 65% production defects reduced
- 98% first-pass deployment success
- 40% faster CI/CD pipelines
- 80%+ test coverage
- 99.9% uptime SLA
- 45% MTTR reduction

📁 PROFESSIONAL EXPERIENCE

Software Tester, [AnnexTech Software](#) 03/2024 – 09/2024 | Gujarat, India

- Headed real-time defect triage sprints by correlates telemetry from Firebase Crashlytics and Spring Boot Actuator via Prometheus/Grafana stacks, isolating complex asynchronous race conditions and resolving latent SQL N+1 query execution bottlenecks to cut Mean Time to Resolution (MTTR) by 45%.
- Eliminated memory leaks and UI thread blocking in the Flutter engine by profiling widget trees, optimizing state mutations via BLoC, and tuning Java Virtual Machine (JVM) garbage collection policies to drop latency overhead.

Software Developer, [AnnexTech Software](#) 01/2023 – 02/2024 | Gujarat, India

- Engineered a comprehensive testing infrastructure achieving 80%+ code coverage across presentation, domain, and data layers via flutter_test, bloc_test, and mockito; intercepted 60% of regressions prior to the staging environment.
- Orchestrated matrix-based parallel job execution in GitHub Actions workflows, optimizing caching mechanisms to slash continuous integration compile times and compress deployment velocity by 40%.

Software Developer Intern, [AnnexTech Software](#) 07/2022 – 12/2022 | Gujarat, India

- Contributed to early-stage structural design reviews, advocating for strict separation of concerns and decoupled modularity to ensure long-term codebase testability and horizontal scalability.
- Implemented deterministic unit testing constraints and code clean-up routines during early development phases, establishing a foundational reference pattern for code quality, dependency management, and minimized technical debt.

🎓 EDUCATION AND CERTIFICATES

Master of Engineering, [Technische Hochschule Ingolstadt](#) 10/2024 – 03/2026 | Ingolstadt, Germany

Artificial Intelligence for Autonomous Systems

Bachelor of Engineering, [Gujarat Technological University](#) 07/2019 – 06/2023 | Gujarat, India

Computer Science and Engineering

Google Professional DevOps Engineer (2023)

Google Cloud Big Data & Machine Learning (2025)

🏆 AWARDS

GOLD MEDALIST, S.N.P.I.T&R.C. 2023

Final CGPA: 8.32

BEST WORKING PROJECT, S.N.P.I.T&R.C. 2023

Image Segmentation and Object Detection

ROCKETRY DEVELOPMENT, S.N.P.I.T&R.C. 2021

Assembling rockets for testing with different fuels and materials

G5 WINNER, R.N.G.P.I.T. 2021

Innovative start-up project idea.

🌐 LANGUAGES

English: Professional (C1), **German:** Advanced (B1), **Hindi:** Native (C2), **Gujarati:** Native (C2)

KEY PROJECTS

[Portfolio Website](#)

04/2026 – 05/2026

- Full-Stack web application portfolio, details and cover letter can be downloadable from the website. [Click Here](#) 

[AI Team-Meetup](#)

10/2025 – 12/2025

- Real-time multilingual video chat application supporting simultaneous cross-language conversations with zero-latency translation.

[Voice Recognition Agent](#)

02/2025 – 04/2025

- A FastAPI-based voice agent featuring NLU-driven intent classification and entity extraction for seamless mobile integration

[Real-Time Weather & Mapping](#)

05/2025 – 05/2025

- Cross-platform app with live weather overlays, location-based queries, and offline caching using Hive.

[Image Segmentation & Object Detection](#)

02/2022 – 01/2023

- Trained and benchmarked segmentation models (YOLO + CNN) on custom datasets; integrated into a Flutter preview UI.

Rocketry Development, (Indian Space Research Organisation)

02/2022 – 07/2022

- Designed and executed scale-model test campaigns to validate performance trends and refine sizing assumptions.

SKILLS

Programming Languages: Java, Dart, Python, C++, SQL, JSON, XML, Bash, Shell

Frontend & Mobile: Flutter SDK, BLoC/Riverpod/Provider, Dart UI/Widgets, go_router, cached_network_image, flutter_animate, Figma-to-Code

Backend & APIs: Spring Boot, Spring Security (JWT/OAuth2), Spring Data JPA, RESTful Microservices, OpenAPI 3.0, dio, retrofit, freezed, json_serializable

Architecture & Design: Clean Architecture, Feature-First Structure, MVVM, SOLID Principles, RBAC, Design Patterns, Dependency Injection (get_it)

Database & Storage: MySQL, PostgreSQL, Redis, Firebase Firestore, Hive, Drift, Offline-first Caching

Cloud & DevOps: Docker, Kubernetes, GitHub Actions, Fastlane, JFrog Artifactory, Firebase (Auth, Crashlytics, Remote Config, App Distribution)

AI/ML: TensorFlow, PyTorch, LangChain (Dart), NLP (spaCy, NLTK), OpenCV, Computer Vision, FastAPI Bridge

Networking & Real-Time: WebSocket, gRPC, rxdart, JWT Refresh Interceptors, Exponential Backoff, Circuit Breakers

Dev-Side Testing: flutter_test, integration_test, bloc_test, mockito, Appium, RestAssured, Postman, JUnit, SonarQube, Golden Testing

Soft Skills: Project Management, Project Leadership, Problem Solving, Decision Making, Results-Oriented Approach, Strategic Planning, Cooperative.
